

# DOSATRON®

WATER POWERED DOSING TECHNOLOGY

# 2.5

m<sup>3</sup>/h

## D 25 RANGE

### SPECIFICATIONS

- Injection Range:  
**0.07 – 10 %**  
[1 : 1500 - 1 : 10]
- Water flow range\*:  
**10 l/h - 2.5 m<sup>3</sup>/h\*\***  
[0.16 l/mn - 41.66 l/mn]  
[1/3 US Pint/min - 11 US GPM]
- Operating pressure:  
**0.3 - 6 bar\*\***  
[4.3 PSI - 85 PSI]
- Concentrated additive injection:  
**0.007 - 200 l/h**  
[0.004 US Fl oz/min - 0.88 US GPM]

\*For other fluids than water, please contact us  
\*\*D 25 RE 10: see on the back

### A unique technology associating all dosing functions

#### Dosing Technique:

Non-electric proportional

#### Energy Source:

Water flow and pressure

#### Integrated functions:

- **Metering:** volumetric hydraulic motor
- **Injecting:** continuous proportional injection of liquid or soluble concentrate
- **Regulating:** proportionality servo-controlled by the water flow
- **Mixing:** integrated mixing

#### Package contents:

- 1 Dosatron, 1 wall bracket,
- 1 Suction tube 175 cm [69"],
- 1 Owner's manual

# D 25 RANGE

## Operating principle

Installed directly in the water supply line, the Dosatron operates by using the flow of water as the power source. The water activates the Dosatron, which takes up the required percentage of concentrate directly from the container and injects it into the water. Inside the Dosatron, the concentrate is mixed with the water, and the water pressure forces the solution downstream. The dose of concentrate will be directly proportional to the volume of water entering the Dosatron, regardless of variations in flow or pressure, which may occur in the main line.

## Proportional injection externally adjustable

The injection rate is set by lining up the top of the adjusting sleeve with the desired ratio on the scale. The amount of injected concentrate is proportional to the amount of water coming into the Dosatron: i.e. Adjustment at 1% = 1 : 100 = 1

Volume of concentrate + 100 Volumes of water.

## The 2.5 m³/h range

| REF.                       | DOSAGE       | PRESSURE    |
|----------------------------|--------------|-------------|
| <b>FIXED</b>               |              |             |
| D 25 F                     | 0.8 %        | 0.3 - 6 bar |
| D 25 F 1                   | 1 %          | 0.3 - 6 bar |
| D 25 F 02                  | 0.2 %        | 0.3 - 6 bar |
| D 25 F 2                   | 2 %          | 0.3 - 6 bar |
| <b>EXTERNAL ADJUSTMENT</b> |              |             |
| D 25 RE 1500               | 0.07 - 0.2 % | 0.3 - 6 bar |
| D 25 RE 09                 | 0.1 - 0.9 %  | 0.3 - 6 bar |
| D 25 RE 2/IE               | 0.2 - 2 %    | 0.3 - 6 bar |
| D 25 RE 4                  | 0.5 - 4 %    | 0.3 - 6 bar |
| D 25 RE 5/IE               | 1 - 5 %      | 0.3 - 6 bar |
| D 25 RE 10/IE*             | 3 - 10 %     | 0.3 - 4 bar |

\*2m³/h limit

Other product lines available to treat water flows upto 0.7 m³/h, 1.5 m³/h, 4.5 m³/h, 8 m³/h, 20 m³/h, 30 m³/h, 60 m³/h... For special models, accessories and particular systems: please consult us.

## Specifications

| General                                                     |                                                                                              |
|-------------------------------------------------------------|----------------------------------------------------------------------------------------------|
| - Maximum operating water temperature                       | 40° C [104° F]                                                                               |
| - Minimum operating water temperature                       | 5° C [41° F]                                                                                 |
| - Dosing rate                                               | i.e. Adjustment at 1 % = 1 : 100 = 1 V concentrate + 100 V water                             |

| Dosage                                                      |                                                                                              |
| - Injection                                                 | internal at the inlet                                                                        |
| - Dosing plunger                                            | simple effect, injection on the upstream                                                     |
| - Injection check valve                                     | spring-loaded cone                                                                           |
| Suction                                                     |                                                                                              |
| - Self-priming                                              | yes                                                                                          |
| - Maximum viscosity of concentrate                          | 400 cPs at 20°C [68°F] - V kit recommended > 200 cPs                                         |
| - Maximum vertical or horizontal suction of the concentrate | 4 m [13ft]                                                                                   |
| - Strainer                                                  | yes - foot strainer with weight                                                              |

### Markets

Environment - Hygiene - Water treatment - Vehicle wash - Metal processing - Food processing - Graphic Arts - Horticulture - Livestock...

### Principal applications

Medication - Disinfecting - Cleaning - Fertigation - Phytosanitation - Supplementation - Lubrication - PH/TH Correction - Sanitation - Flocculation - Vehicle wash...

### Installation

**Regulations:** Refer to local water regulations, prior to installing your Dosatron.

**To optimize your Dosatron, we advise to:**

- Install a filter (300 mesh [60 microns]) upstream, depending on your water quality.
- Change the dosing seals at least once a year.
- Rinse as often as possible with clear water.
- Turn off the water supply and allow the pressure to drop to zero before adjusting the injection rate.
- Install necessary protections for excess flow, excess pressure and water hammer (anti-hammer flow/pressure device).
- Install your Dosatron on a total by-pass line.

For all other installation advice, please consult us.

### Size

- Package size: 52 x 16.8 x 17.5 cm [20 1/2" x 6 5/8" x 6 7/8"]
- Package weight: 1.7 kg [~3.7 lbs]

## Standard material

Housing: polyacetal, HT

Motor Piston: polypropylene, polyamide, stainless, steel, VF or HT, polyacetal

Injection area: polypropylene, polyethylene, hastelloy (check valve spring)

Injection hose: PVC

## Available options

(■ : Option ● : Standard ★ : not available or not necessary for this model)

### Optimized compatibility

- AF: Recommended seals for alkaline concentrate
- VF: Recommended seals for acid, oil, odour- or pest control concentrates
- PVDF: Housing
- H: Hastelloy plunger rod
- IE: External injection
- V: Kit for viscous concentrate
- Injection hose: Special material hose and foot strainer available

PVDF housing + IE

IE

### Optimized installation

- BP : integrated by-pass
- ★ Other fittings
- Strap
- Other: please contact us

These options allow adapting your Dosatron to your needs. Contact our technical service to help determine what option you may need.

Each Dosatron unit is factory tested and registered.
